A few sample Web Applications

- **Recipe System**
  - Users should be able to register and create an account
  - Users should be able to choose from a database list of ingredients and create/save a recipe
  - Any user should be able to browse existing recipes and search by name or by selecting specific ingredients

- **Online Take-Away System**
  - Restaurant owners can register their restaurants and create an account
  - They can add a menu of items for sale from their takeaway with corresponding description and prices
  - Anonymous users can search for takeaways and browse their menus and place an order (payment process not required)

- **Buy and Sell System**
  - Facility to allow users to register
  - Registered users can place advertisements on the system under certain categories
  - Users can search for items or by category and place bids on items

A few sample Web Applications

- **Library System**
  - Users should be able to browse a library catalogue, searching by author and title
  - After log in, users should be view books and expiry dates on their account
  - Librarians can log in and assign books or change expiry dates for users
- **Banking System**
  - Customers can log in and view their bank account details
  - Customers should be able to transfer money between separate accounts and view past transactions
  - Customers should be able to pay off bills
- **Message Board System**
  - Users must register to post messages to the forums
  - Users can post new threads or reply to existing threads
  - Multiple forums should be available
- **Online Dating System**
  - Users should be able to register and input their personal details
  - Users should be able to browse other users and search by categories
  - Users should be able to arrange dates with each other, with details stored in the database
- **Room Booking System**
  - Administrator Users can create new 'Rooms' available for booking
  - Standard Users should be able to register and log in
  - Standard users can make bookings on rooms and view their booking
